Polynesia	10	16,164	-	-	0%	-	-	0.00%	16.90%	

Statistical Source: UN FAO Aquastat database (www.fao.org). **IRWR** = Internal renewable water resources (million cubic meters). **ARWR** = All renewable water resources (million cubic meters), including inputs from international waterways. **WW** = Water withdrawals (million cubic meters). **p.c.** = cubic meter per capita (per person). **%** = Withdrawals divided by ARWR; anything above 10% is considered stressed. Greater than 100% means this area is dependent on water imports.
